FOR IMMEDIATE RELEASE

PUBLIC MEETING ON TYSON'S SUPERFUND SITE FEASIBILITY STUDY

PHILADELPHIA, PA - - The U.S. Environmental Protection Agency and the Pennsylvania Department of Environmental Resources will conduct a public meeting on Wednesday, October 10, 1984 at 7:00 p.m., to discuss the draft Remedial Investigation Report and draft Feasibility Study for Tyson's Dump, a Superfund site in Upper Merion Township, Pa. The meeting will be held at the Upper Merion Township Building, at 175 West Valley Forge Road in King of Prussia.

The draft Feasibility Study is now available for public review at the Township Building, the Fire Marshall's office (also located at 175 West Valley Forge Road, King of Prussia), and at the Wolfshon Library, 180 Town Center Road, King of Prussia. The draft feasibility study lists several clean-up alternatives, which were selected on the basis of the field work and investigation of the site.

The draft feasibility study is the second portion of the \$370,000.00 Superfund Study process. The draft Remedial Investigation Report, which is available for public review at the same locations, was completed in August, 1984. That document outlined the work that was done at the site since December, 1983, to determine the extent of contamination. The next step after the public meeting concerning the studies will be a review of the comments and a determination on the best plan of action.
